Enquiry No. 2438.

HIGH SPEED OIL CIRCUIT BREAKER FOR DAVANGERE TOWN ELECTRIFICATION. E.D. 476.

GENTLEMEN,

I write to request you to quote your best price and earliest time of delivery for the following materials :—

One—High Speed Oil Circuit Breaker, indoor, floor mounted, 78,000-volt, 600 amperes, T.P. S.T., solenoid operated, automatic, remote control, complete with bushing type current transformers and auxiliary switches and sufficient quantity of transil oil for the initial filling. The rupturing capacity of the oil Circuit Breaker should be not less than 500,000 K. V. A. at the rated voltage and the speed should be such as to isolate the circuit within 1/10 of a second in cases of severe faults. These oil Circuit Breakers are meant for use at the end of a 50 mile transmission line of 78,000-volts, 3-phase, 3-wire, 25-cycle system with neutral solidly grounded. The solenoid mechanism should be capable to operate from 110-130-volts battery; besides, there should be provision for hand-operating the Circuit Breaker. The mechanism should be proof against pumping, either during opening or closing and should be trip free. The bushing type current transformer should have a secondary of 5-amperes and be fitted with taps for taking the following 3 ratios, viz., 200 : 100 : 50 : 5. Each oil Circuit Breaker should be provided with 6 current transformers the ratios being identical. The bushings of the oil Circuit Breaker should be oil-filled and with a gauge glass and breather at the top. At the bottom of the bushings there should be a vent for draining off the oil. The complete unit of each bushing should be such as to be capable of being easily replaced. The oil Circuit Breaker should be capable of operation twice with an interval of 2 minutes and be capable of carrying full load afterwards for such time that it is possible to inspect the same. Auxiliary switches fitted in the operating mechanism should have a cover, dust and insect-proof. The temperoture rise of any part during full load conditions should not exceed 40° above an ambient tempera- ture of 35°.

Full details with regard to the rated voltage, rupturing capacity and the time required for isolating the circuit by the oil Circuit Breaker should be furnished.

The oil Circuit Breaker should be of such dimensions so as to fit and be installed in a space of 11 ft. long, 6 ft. broad and 14 ft. in height. Rough dimensional sketches showing the overall dimensions and the details of the breaker to be supplied should be furnished with the quotation.

Quotations for materials of German manufacture should be in *Reich-marks* for payment out of the Mysore Government moneys in the Reichskredit Gessolschaft, Berlin, which represent the realizations on account of sale of sandal oil in Germany.

The price to be quoted should be for delivery c.i.f., Madras.

This enquiry will close on the 15th September 1937.

As the materials are required very urgently, you may get the prices by cablegram and communicate the same so as to reach this office before the above date.
